**Team Members' Names: Kendall Kreinhagen &  
Heidi Kensinger**

# Background Leading to this Inquiry

Using feedback from the High Reliability School Survey from level 2, our team wanted to address indicator 2.2 "Support is provided to teachers to continually enhance their pedagogical skills through reflection and professional growth plans.

- **Teachers:**

- Based on our 18/19 SIP goals, what was the teacher's comfort level in reading, math and writing instruction?
- What supports could admin and coaches provide teachers?
- How will the teacher raise achievement in their class?
- What was the student's BOY and MOY reading and math data telling the teacher?

# **Purpose of This Inquiry**

Therefore, the purpose of our action inquiry was to create individual action plans to positively enhance a teacher's pedagogical skills while also impacting student achievement at Greenbriar.

# **Our Wondering**

With this purpose, we wondered how creating individual professional growth plans would enhance their pedagogical skills through reflection.

# Our Actions

- Teachers completed 2 School Improvement Assessments (rating 1-4)
- Met with teachers for Fall and Winter Data days
- Created Action Plans with each teacher in Jan.
- Met to review action plans in Feb individually & April in grade level teams
- Completed 4 learning walks 2nd semester

Name	Developing a unit of study based on concepts and skills modeled and embedded in mentor texts.	Supporting student agency by allowing authors to have choice in topic and occasional choice in genre.	Conduct mini-lessons utilizing the mini-lesson framework (connection, teach, active engagement, link).	Facilitate a strategic share and reflection at the end of each workshop session.	Develop student agency by conferring with authors daily during independent writing.	Utilize the Next Step Forward in Guided Reading by Jan Richardson to incorporate the Essential Elements of the PYP to drive instruction and planning.	Use the 95% continuum to guide an inquiry-based word study.

GREENBRIAR 2018-2019 SMART GOAL/ACTION PLAN		
Name: Heldl Kensinger	Date: 12/21/2018	Grade: 1st
Professional Growth Goal		
Math Goal: How will achieving this goal improve student learning and engagement?		
Goal: For the 2018-2019 school year, incorporate number sense activities into small groups on a daily basis.		
Action Steps: Getting resources from Stacy, strategic planning, meeting with small groups every day.		
How will you measure your progress: observations, formal and informal assessments		
Reading Goal: How will achieving this goal improve student learning and engagement?		
Goal: For the 2018-2019 school year, I will incorporate every component of the Jan Richardson's plan for guided reading for each reading group on a consistent daily basis.		
Action Steps: I will time myself for each component to ensure that I do each one every day.		
How will you measure your progress: Lesson plans, written notes		

## How has Having an action plan helped you as a teacher?

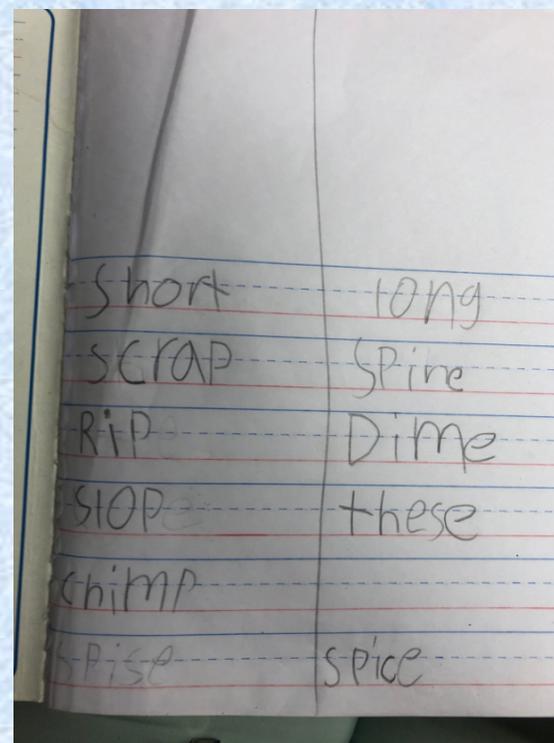

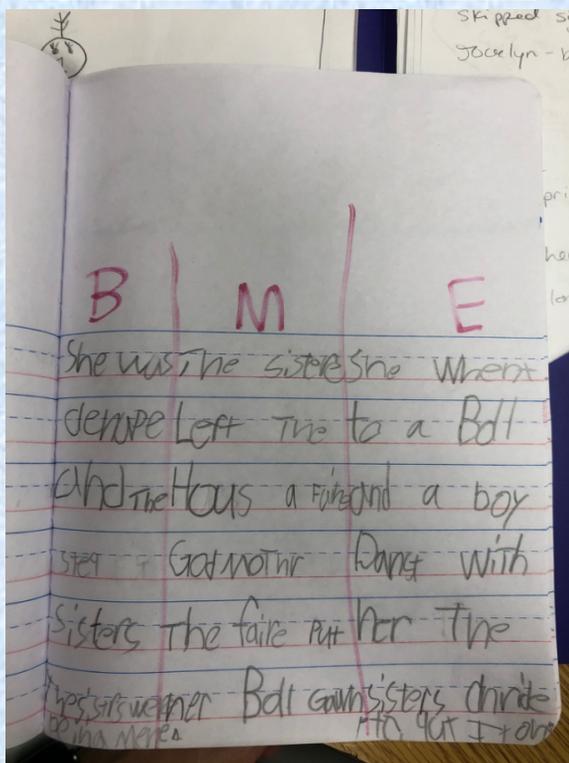

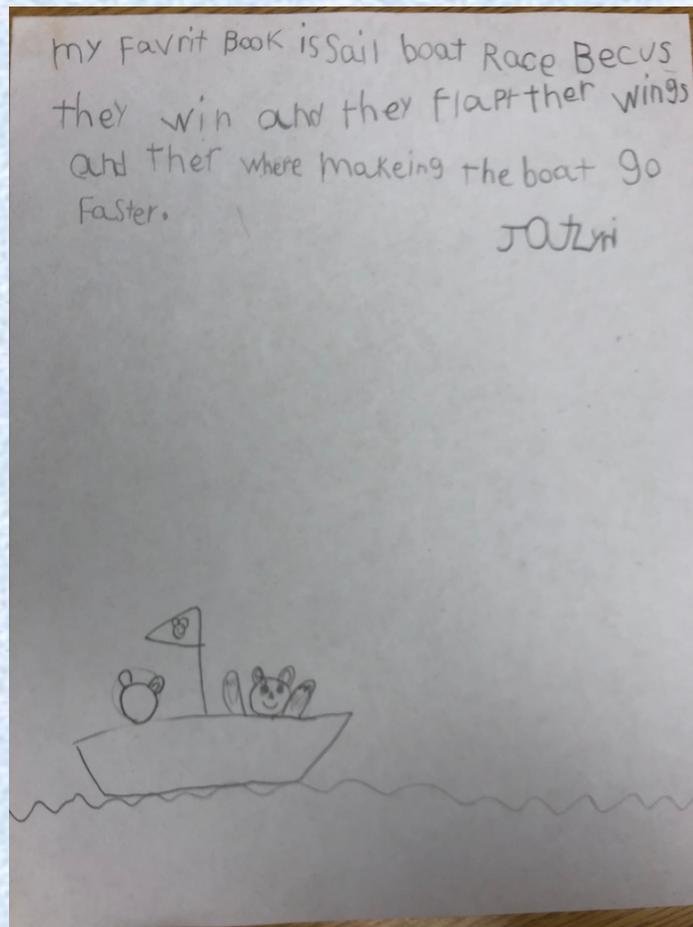

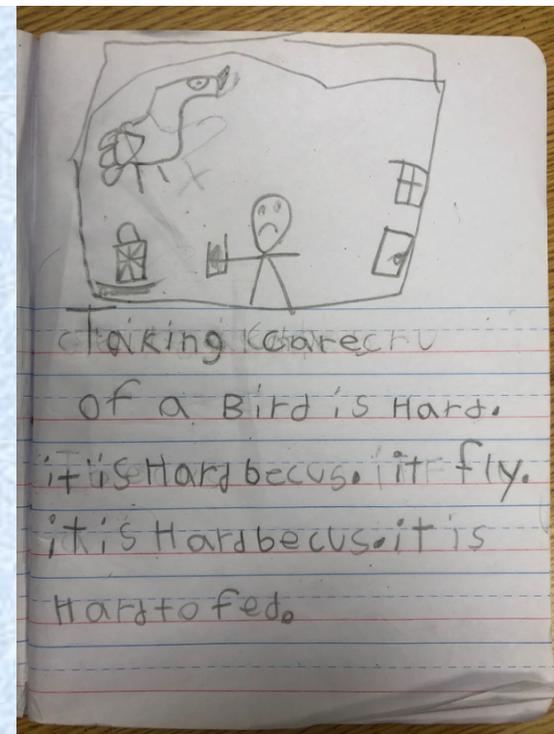

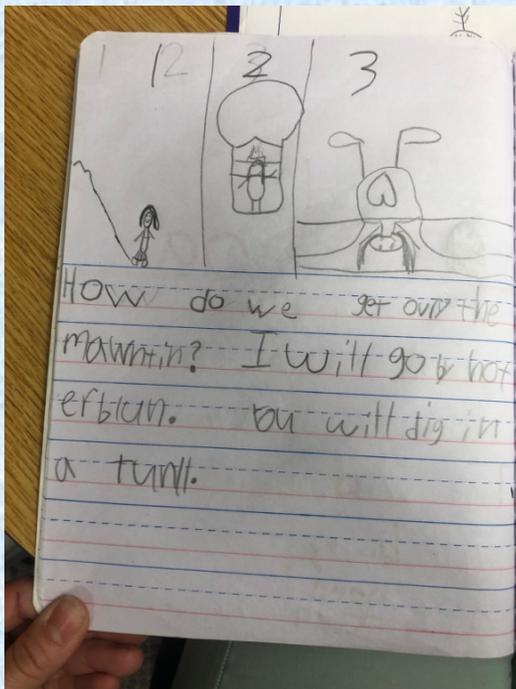

- I have always been very good at differentiating plans and making them very difficult, sometimes because of this, I “run out of time.” This has helped me be more aware of my time and how I am using it throughout my lessons

## How has Having an action plan helped your students?

- They know the routine and are prepared for what will come next
- They have shown growth in their ability to understand sounds and manipulate them and in their writing.

GREENBRIAR 2018-2019 SMART GOAL/ACTION PLAN			
Name: Emily Dills	Date: 12-20-18		Grade: 1
Professional Growth Goal			
Math Goal: How will achieving this goal improve student learning and engagement?			
Goal: By May of 2019 75% of my students will increase their math fact fluency in addition and subtraction to an average of 75% mastery based on grade level assessments			
Action Steps: incorporate daily math fact fluency communication for parents to support students at home, math fact fluency station during math workshop and weekly leveled assessments			
How will you measure your progress: weekly grade level math fact fluency assessments			
Reading Goal: How will achieving this goal improve student learning and engagement?			
Goal: By Math of 2019 75% of my students will increase their sight word recognition to an average of 75% mastery based on grade level assessments.			
Action Steps: incorporate word study station in reader's workshop to develop independence and exposure to sight word recognition			
How will you measure your progress: sight word checklists			

## How has Having an action plan helped you as a teacher?

- helped to focus in on what my areas of improvement
- Focus on what is important and not worry about the little things

## How has Having an action plan helped your students?

- Helped students work ethic and engagement level
- added accountability
- taught them strategies to use on their own

GREENBRIAR 2018-2019 SMART GOAL/ACTION PLAN		
Name: Stefanie Harris	Date: 12/17/18	Grade: 3
Professional Growth Goal		
Math Goal: How will achieving this goal improve student learning and engagement?		
Goal: I will integrate math facts small groups to better reach my students' needs.		
Action Steps: Small group facts practice during 10 minute math. Observe colleagues leading math fact small group lessons		
How will you measure your progress: District benchmarks and Xtra math.		
Reading Goal: How will achieving this goal improve student learning and engagement?		
Goal: I will improve student engagement during literacy stations.		
Action Steps: I will use extrinsic motivations for my students. I will try new independent work stations for my students.		
How will you measure your progress: On-task points on Class Dojo.		

## How has having an action plan helped you as a teacher?

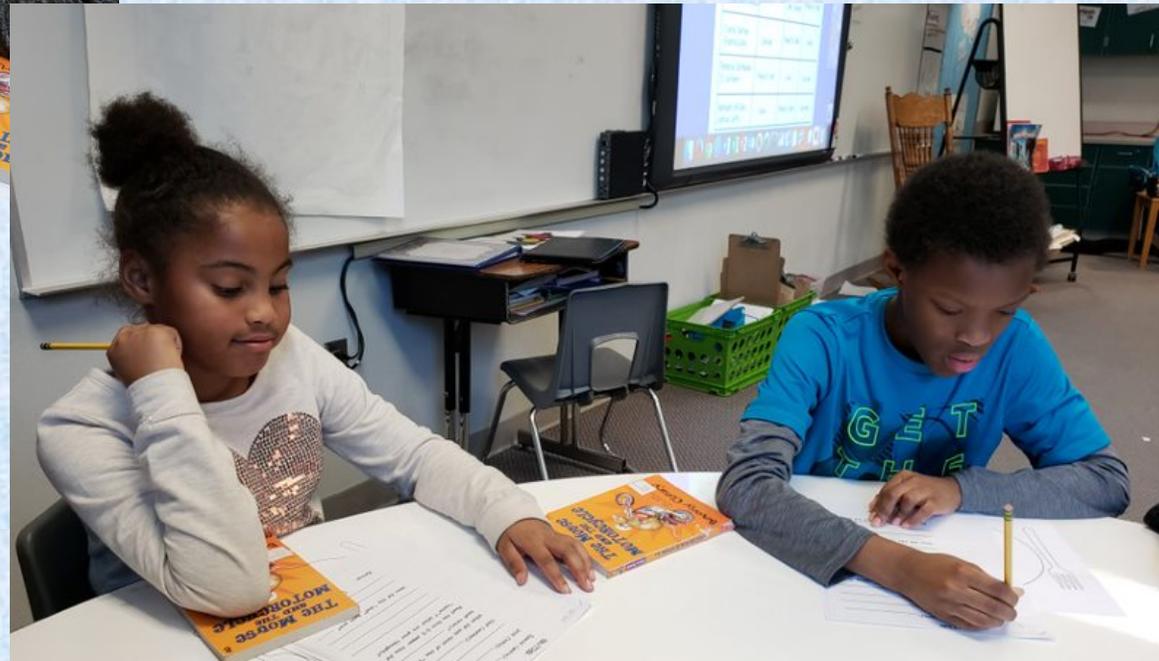

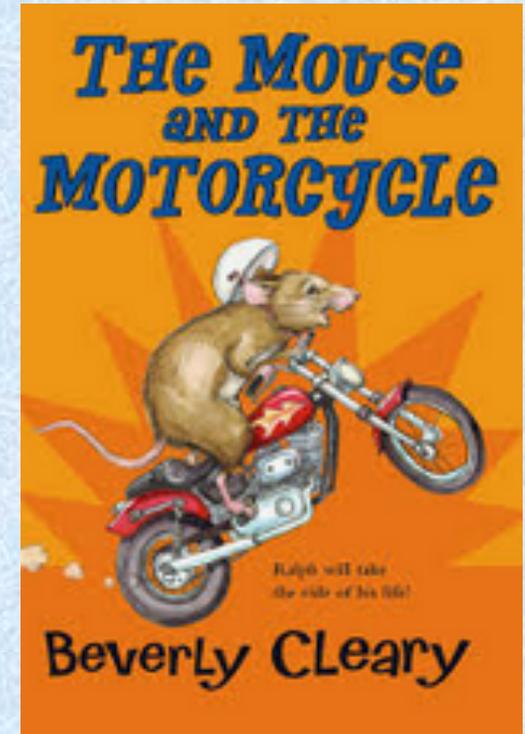

- I was able to target 4 specific students that struggled with effort and engagement
- Changing activities and looking into things that met their interests to help plan
- opened eliminate interruptions

## How has Having an action plan helped your students?

- increased engagement with teacher
- Increased engagement with independent stations

# Our Data

## Harris: Book Talks

## GREENBRIAR 2018-2019 SMART GOAL/ACTION PLAN

Name: Jordan	Date: 12/20/18	Grade: 4
Professional Growth Goal		
Math Goal: How will achieving this goal improve student learning and engagement?		
Goal: Do a better job of differentiating teacher group lessons. (Improve yellow to green)		
Action Steps: Group students on ability and plan appropriate lessons.		
How will you measure your progress: Monitor weekly plans, NWEA scores		
Reading Goal: How will achieving this goal improve student learning and engagement?		
Goal: Grow students in lexia		
Action Steps: create a process to track student work during stations		
How will you measure your progress: track progress on data tracker		

### How has having an action plan helped you as a teacher?

- I have focused more on who I am helping and why
- I have more awareness & intentional planning & instruction
- I am able to reflect on these specific goals and modify
- Helped to create goals for the whole 4th grade team

### How has Having an action plan helped your students?

- Students have become more aware and have had more accountability
- They have taken more ownership of their work and of their mistakes

GREENBRIAR 2018-2019 SMART GOAL/ACTION PLAN			
Name: Matt Mackowiak			Grade: 5
Professional Growth Goal			
Math Goal: How will achieving this goal improve student learning and engagement?			
Goal: Keep making changes and adapting ON THE FLY daily.			
Action Steps: When there's a teaching moment, "come to the carpet". Make everything more visual.			
How will you measure your progress: Canvas data. % of assignments turned in.			
Reading Goal: How will achieving this goal improve student learning and engagement?			
Goal: Stick to the routine. Change habits within the routine.			
Action Steps: Meeting with students about Canvas answers. Re-doing assignments with students or sending it home.			
How will you measure your progress: Canvas scores + small group progress monitoring.			

## How has Having an action plan helped you as a teacher?

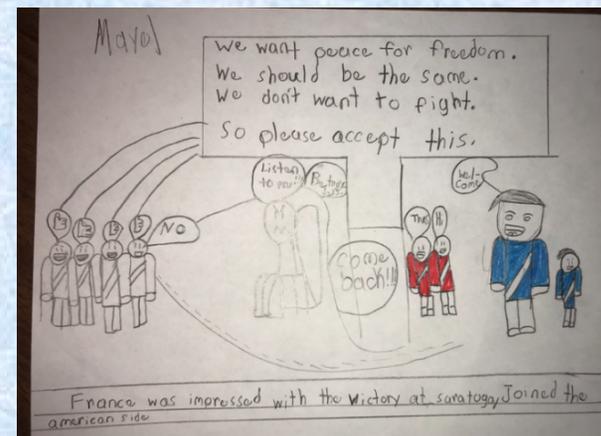

- Recognizing areas of improvement
- use data as a baseline
- teaching has been more fluid with less interruptions
- Able to adapt my teaching style and routines that aren't working

## How has Having an action plan helped your students?

- Students have felt comfortable talking openly about what does and doesn't work for them
- They give specific feedback on how to help them learn

# Our Data

## Mackowiak: Enhancing Engagement

A teacher wants to distribute 250 pencils evenly to 36 students. What is the largest number of pencils each student will receive? Explain how you determined your answer.

Your Answer:

The answer I got was 43. How did I get it you ask well look.

1. I did the box method but that took to long.
2. So I did the quicker one and did  $36 \times 10$ ,  $36 \times 2$ ,  $36 \times 4$ .
3. I found the one that was closer to 250 and it was four.
4. So I subtracted  $144 - 250$  and got 206.
5. then I looked to see what timed 36 equaled 206.
6. I did not have  $36 \times 6$  so i did that It was to small.
7. I did not have 3 so I tried that It was a little over board but I could not go lower so that is how I found my answer.

A teacher wants to distribute 250 pencils evenly to 36 students. What is the largest number of pencils each student will receive? Explain how you determined your answer.

Your Answer:

- 1 I did 250 divide by 36
- 2 then I did 36 times 5 =180
- 3 then I did  $25 - 180 = 70$
- 4 I did 36 times 1=36
- 5 I put  $70 - 36 = 34$
- 6 I did  $5 + 1 = 6$
- 7 I put 6 r 34
- 8 The largest number of pencils each student will receive is 6

# Our Discoveries

- Learning Statement 1:
  - What you monitor will move!
- Learning Statement 2:
  - When teachers take ownership in their growth and data, we see positive results

# Learning Statement 1: What you monitor will move! Data Celebrations

- 37/42 Bubble students grew at least 1 F/P Level (grades 2-5)
- Kindergarten Pre A Levels
  - August- 90 students at Pre A level
  - September- 68 students in Pre A level
  - October- 38 students in Pre A level
  - January-14 students in Pre A level (12%)
- 97% of Greenbriar teachers are utilizing math workshop at least 2 days a week (up from 50%)
- 97% of Greenbriar teachers conduct guided reading in small groups based on students' individual needs to support and develop student agency as readers (up from 79%)

## Learning Statement 2: When teachers take ownership in their growth and data, we see positive results.

Creating a goal based on a self-perceived weak area can help teachers stay intentional toward improvement. A blog from Bright Hub Education, written by Lady Lit, shares "If a teacher does not take time to evaluate his/her performance, a teacher will have a tendency to do the same things in the same way, to teach the same concepts the same way, and to use the same exercises again and again.

- 28/35 teachers came prepared with updated reflections and data to share with the team 4/9

# Where We Are Heading Next

- Meet with individual teachers in May to review final data
- Utilize the final data collected to help drive our SIP Professional Development Plan for 19/20
- Celebrate our work!
- Meet with teachers in the fall of 2019 to create individual action plans based on beginning of the year student data and teacher reflections
- Learning walks to align with action plans

## Lights, Camera, Action Plans

**Principal Name:** Jamie Alexander

**School Name:** Greenbriar Elementary

**Team Members' Names:** Kendall Kreinhagen and Heidi Kensinger

**Principal's Email Contact:** jalexander977@gmail.com

### **Background Leading to Our Inquiry**

Greenbriar Elementary is part of the MSD of Washington Township corporation. Greenbriar Elementary has an enrollment of 803 students. It is the largest elementary in the district. Our ethnicity groups are 1% American Indian, 3% Asian, 53% Black, 28% Hispanic, 5% Multi Racial and 10% White. Our overall free and reduced lunch count is at 87% for this school year. Greenbriar has 35 classroom teachers and a total staff of 98. At the end of the 17-2018 school year, teachers completed a Marzano survey to determine school effectiveness. The results of the survey focused on a safe and collaborative culture, effective teaching in every classroom and a guaranteed and viable curriculum. After reviewing the survey data, the leadership team chose to focus on 2.2-Support is provided to teachers to continually enhance their pedagogical skills through reflection and professional growth plans. This was the beginning of our wondering.

### **The Purpose of Our Inquiry**

Therefore, the purpose of our action inquiry was to create individual action plans to positively enhance a teacher's pedagogical skills while also impacting student achievement at Greenbriar.

### **Our Wondering**

With this purpose, we wondered how creating individual professional growth plans would enhance their pedagogical skills through reflection?

Based upon data from 2.2, it stated that support is provided to teachers to continually enhance their pedagogical skills through reflection and professional growth plans was an area we needed to grow. Therefore, the team set out to help teachers create professional growth plans. We began to dive into these questions:

- Based on our 18/19 SIP goals, what was the teacher's comfort level in reading, math and writing instruction?
- What supports could admin and coaches provide teachers?
- How will the teacher raise achievement in their class?
- What was the student's BOY and MOY reading and math data telling the teacher?

## **Our Actions**

To gain insight into our wondering, teachers completed a school improvement assessment to determine their comfort level with our school improvement (SIP) goals in reading, math and writing. Administration and the curriculum coaches met with teachers in September to review their self assessment and determine the direction they needed to go during the school year professionally. We utilized beginning of the year data from students to create a math and literacy growth goal for each teacher which included ways to improve their craft. Teachers created a SMART goal to ensure we would be able to measure student data throughout the year.

Administration and the curriculum coaches met with teachers in October, December, February and April to review student progress and teacher progress on their specific goals. Teachers completed a reflection portion of the action plan prior to attending the meeting. Each teacher completed a self assessment on our school improvement goals in December and April. All teachers participated in learning walks once a month from Dec-April focused around their individual need to grow professionally based on our SIP goals.

## **Data Collection**

Our team collected individual teacher data focused around two questions. Here are a few responses from our teachers:

- How has having an action plan helped you as a teacher?
  - I have always been very good at differentiating plans and making them very difficult, sometimes because of this, I “run out of time.” This has helped me be more aware of my time and how I am using it throughout my lesson.
  - helped to focus in on what my areas of improvement
  - I have more awareness & intentional planning & instruction
  - I am able to reflect on these specific goals and modify
  - helped to create goals for the whole 4th grade team
  - I was able to target 4 specific students that struggled with effort and engagement
- How has having an action plan helped your students?
  - students know the routine and are prepared for what will come next
  - students have shown growth in their ability to understand sounds and manipulate them and in their writing
  - helped students work ethic and engagement level
  - added accountability
  - taught them strategies to use on their own
  - increased engagement with teacher and independent stations

## **Our Discoveries**

As a result of analyzing our data, two important things we learned include:

- Learning Statement One: What you monitor will move!
- Learning Statement Two: When teachers take ownership in their growth data, we see positive results.

Monitoring student data closely with individual teachers and having specific goal setting conversations, will allow us to see improvement. We saw an increase of teachers utilizing math workshop from 50% to 97% during the school year which was a new initiative from the district for our math block this year. Our kindergarten students working at a Pre A level decreased from 72% to 3% utilizing the Jan Richardson approach to guided reading. 97% of our teachers conducted guided reading in small groups daily based on individual student needs to develop student agency. Overall, our students met district growth and proficiency targets based on NWEA.

Creating a goal based on a self-perceived weak area can help teachers stay intentional toward improvement. A blog from Bright Hub Education, written by Lady Lit, shares "If a teacher does not take time to evaluate his/her performance, a teacher will have a tendency to do the same things in the same way, to teach the same concepts the same way, and to use the same exercises again and again. If we always do what we have always done, we will get the same results. Overall, our 28/35 teachers came prepared each time with reflections and data to share with the instruction team.

### **Where We Are Headed Next**

Our team felt the action research project helped us unify our efforts toward growing our teachers professionally and increasing our academic achievement through our SIP goals. We felt the processes we added helped teachers reflect on their instructional practices and move student data. Our teachers want to take risks and grow.

Based on our processes this year, and the feedback we received from our teachers, we plan to continue the process of the action plans next year and expand our learning walks. Our leadership team would like to see teacher action plans posted outside classrooms and allow other staff to give teachers feedback on their goals based on observations of the classrooms. Our leadership team will review the action plans to align our professional development sessions to their needs, and feedback during walkthroughs can be easily given. This process has provided the team the opportunity to work through school improvement in a specific and manageable way. Action Research provides a framework that students, teachers, administrators, and other school staff can collaborate to work toward school improvement.
